ACTA MUSICOLOGICA
Fall 1928—Spring 1967
Cecil Adkins — Alis Dickinson

This index contains all of the signed articles and reviews appearing in *Acta Musicologica* through the first fascicle of volume XXXIX. This last fascicle overlaps the first issue of the *RILM Abstracts*; subsequent issues of the journal appear in this latter publication, hence it was not deemed necessary to include them here.

The main body of the index is divided into two parts: an alphabetical author index and a classified subject index. The author index lists the articles of each author in chronological order of publication. Each of the descriptive subject entries in the second part is followed by a number that will refer the reader to the designated article in the author portion of the index; the authors are not listed in the subject index. Such special features as "Society News," "Questions," "Notices," and "Bibliographies of New Books" are listed chronologically in their respective sections of the Appendix.

In addition to the Tables of Contents appearing in the separate volumes, there is also an author index to volumes I-XXV included in the last fascicle of volume XXV. Volumes XXVI-XXXIX include an index of names cited in each volume; this *index nominum* was prepared for the last eleven volumes by Theodora Holm.
